  - Helped Team to test the DB by mock data with various system tools. Guided from senior developers, gaining insights.
- **Front-end Intern** Mumbai, India  
*Devstack Solution* 02/2021 - 04/2021
  - Played a key role in UI design, improving interaction. Cloned components and managed state, accelerating project delivery.
  - used figma, CSS, ui libraries to apply animation and prototyping and layout of the pages, which improve 50% of quality of UI, along with that Designed complex React components using Typescript, custom hooks, and optimizations
  - handled nested states with react context-reducing mechanism, Collaborated with front-end teams and manager and had strong bond with partners

## PROJECTS

- **Food Delivery Application inspired by Uber-Eats** 10/2023 - 12/2023  
*Github*
  - Abstracted APIs with GraphQL and payment gateway, enhancing performance by 40% and reduced API and server cost by 25%. Nov 2023 – Jan 2024
  - By Nest, Postgres integration with ReactJS, Added maps, Scheduling and cloud services, increased connectivity by 20%
  - Designed as per customer required views for an attractive, bug-free, and flexible interface.
- **D-socials a social media-based Web Application** 08/2023 - 09/2023  
*Github*
  - Objected for social network and online community based Chat-App, viewed by more than 500 users
  - Implied Next.js, Tailwind CSS, drizzle-orm. authenticated server by Clerk library and Pusher for real-time notifications.
  - Defined an Express back-end with Prisma, achieving 100% test coverage with Jest for a scalable and bug-free application.
- **Ecommerce Website using Sanity CMS and Next** 04/2024 - 06/2024  
*Github*
  - Researched and developed this application as professional in recent company, Design structure of the ecommerce SPA, including the database and flow of data through APIs at server,
  - Integrated Razorpay as payment and invoice service, Mailgun and Twilio for notification purpose and cloudnary CDN for client as well as server-side various data. Deployed back-end on Sanity CMS, Removed 60% complexity
  - NextJs based fast render client side, bounded sanity client boosted 30% speed, cached 50% of the components.

## EDUCATION

- **KJ Somaiya College of Engineering** Mumbai  
*BTech - Electronics Engineering - 7.1 CGPA* 2020 - 2023
- **Veermata Jijabai Technical Institute** Mumbai  
*Diploma - Electronics - 77.68 %* 2017 - 2020

## SKILLS SUMMARY

- **Languages** Typescript, Javascript, HTML, CSS, PHP
- **Frameworks** ReactJs, ExpressJs, NestJs, NextJs, Hono, RabbitMQ, Socket.io, Sanity.io
- **Databases** SQLite, Postgresql, Mysql
- **Tools** VsCode, Figma, IntelliJ Idea, Docker

## CERTIFICATIONS

---

- **Exploring ReactJS Development** - LinkedIn
- **Docker Essential: A developer Introduction** - IBM
- **Career Essential in GitHub Professional Certificate** - Github
- **Oracle Cloud Data Management 2023 Certified Foundations Associate** - Oracle

## ACHIEVEMENTS

---

- Received recognition for developing a Books reader project at KJ Somaiya College of Engineering
- Solved over 150 problems on Data Structure and Algorithms platforms like CodeChef and Leetcode.
- Completed more than 400 contributions on github
- Handled client requirement with commanding communication and delivering complete package of application.
- made lot of connection via LinkedIn, Hackthon and reddit communities. also publishing my work on twitter regularly
